

Kit Contents:

- Clamp body with pre-drilled holes.
- 2 x M6 V bolts with sledges and wing nuts.

Features:

- Ideal for mounting aerials on a caravan.
- One U bolt fits to the jockey wheel shaft of the caravan allowing you to mount a pole to the other U bolt on the other side.
- Sledges offer extra support.
- No tools required; wing nuts self-tighten by hand.
- Suitable to mount poles up to 2" (50.8mm) outer diameter.
- Made from aluminium and pregalvanised steel to prevent corrosion and give a professional finish.

Instructions:

1. Attach the bracket to the shaft of the jockey wheel, as shown, by tightening wing nuts.
2. Fit suitable mast to the other side of the bracket, again by tightening wing nuts.
3. If possible, push the bottom end of the mast into the ground first to ensure stability.
